DETAILED ACTION

1. Receipt is acknowledged of Applicant's Foreign Priority papers, filed September 29, 2006.
2. Receipt is acknowledged of Applicant's Preliminary Amendment, filed August 13, 2007.
3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "epicyclic or worm gearing" and "separate drive motor or pneumatic cylinder" recited in claims 13-14 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, line 4 the phrase "and/or" is ambiguous, in that it is not clear whether the phrase is intended as all inclusive(both), alternative(either), or mutually exclusive(only one or the other). Similarly, in claim 4, line 4, the phrase "or/and" is deemed indefinite.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claims 10, and 12

recite the broad recitation “adjustable...”, and the claims also recite “in particular...” which is the narrower statement of the range/limitation. Similarly, in claim 13 the broad recitation of a “drive connection...” is recited in addition to a narrower recitation of “preferably...gearing”.

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-5, and 7-10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hall. Hall discloses a manual grinding tool comprising all of the subject matter set forth in Applicant's claims above. Note rotating grinding head(24), and guide device(12) for maintaining a fixed angle with respect to the workpiece.

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 1, and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kolling. Kolling discloses a manual grinding tool having a concentric guide device for guiding the tool across the work, comprising all of the subject matter of Applicant's claims above.

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Morith is cited of interest to show another grinding tool having a guide device movable along the edge of a workpiece by rollers.
